Service and technical support

Bürkert is with you all the way – even on site

- Installation and operation
- Preventive maintenance
- Troubleshooting and fault rectification
- Instruction and training

Bürkert is your partner on site

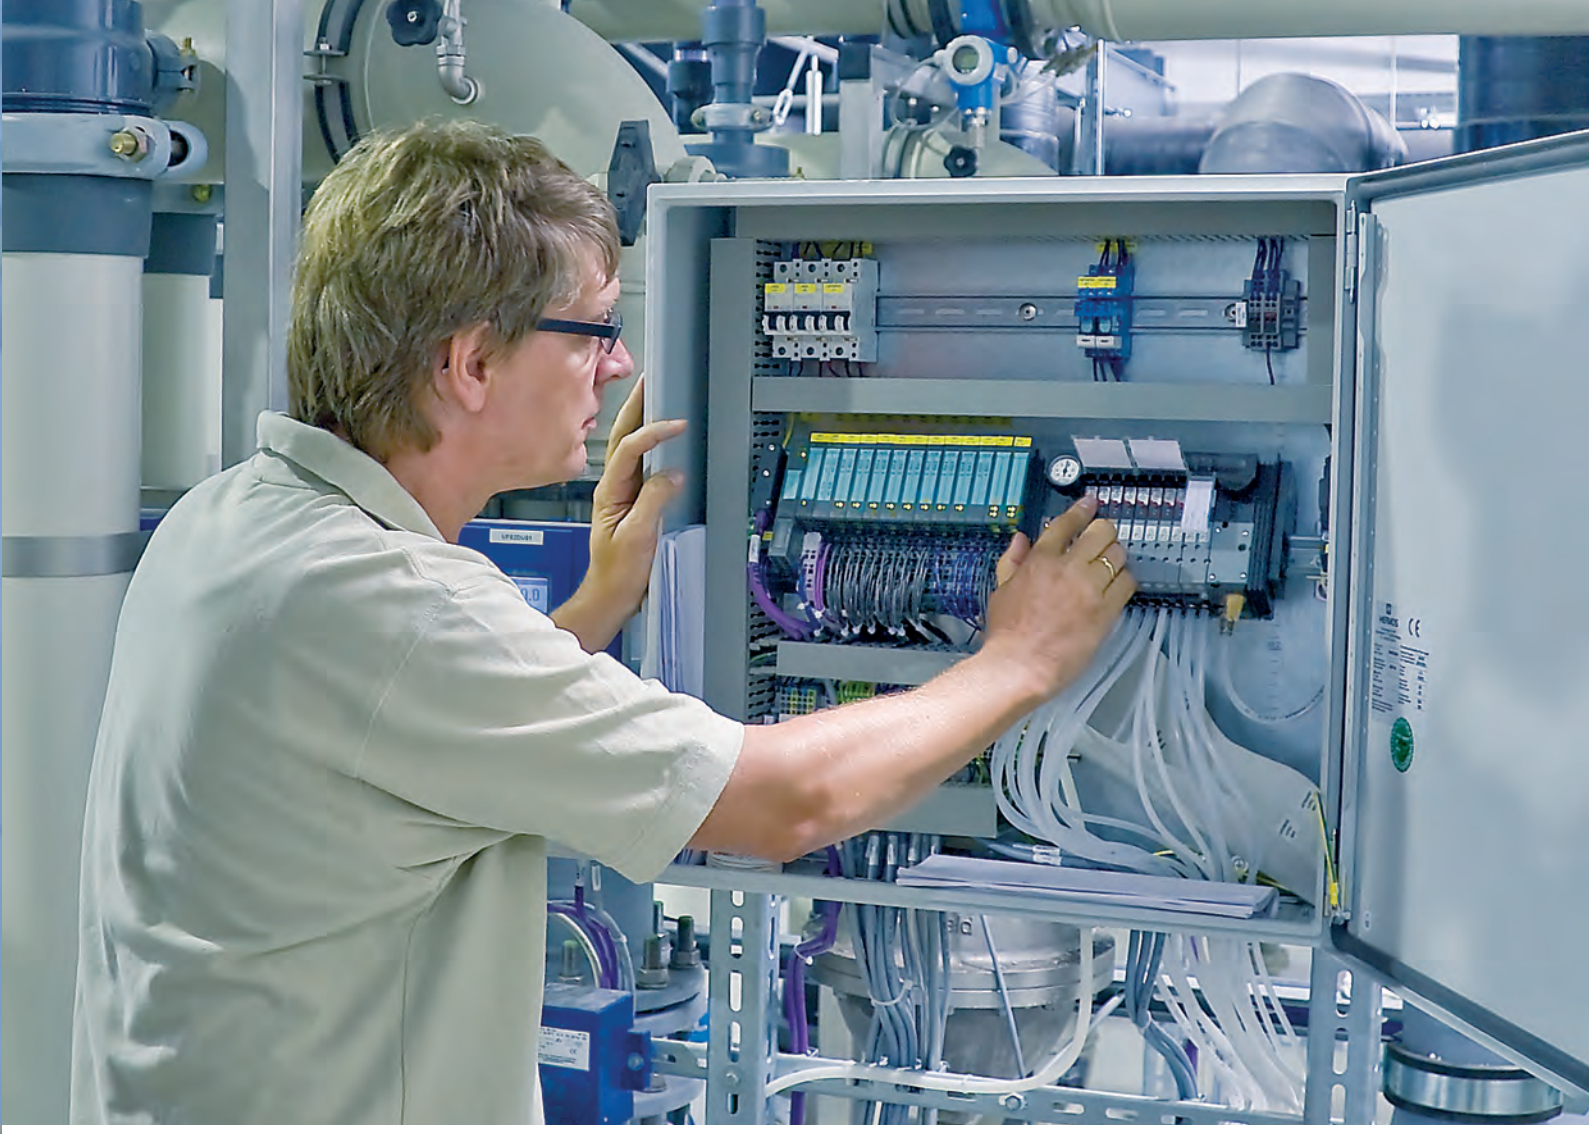
We go the extra mile and offer service and technical support on site. We deliver huge quantities of valves and sensors to our customers every day. Our product portfolio ranges from solenoid valves and pneumatically controlled process valves to controllers and sensors for level, flow, pressure, pH, conductivity and temperature. We supply both single components and complete solutions.

These products naturally have to be connected and commissioned, and Bürkert can assist you with all of this. We offer installation, troubleshooting, service and repairs both on site and in our workshop.

Take advantage of our know-how and reduce your service time and costs

Bürkert has:

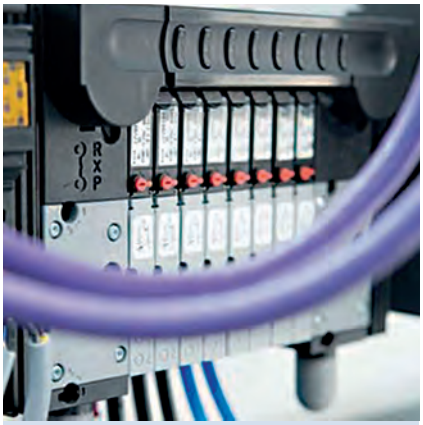
- In-depth product expertise and knowledge of automation processes
- A comprehensive overview of the installation as a whole and can solve even complex problems as a result
- Experience and know-how that enable us to advise you on options for optimisation
- The ability to offer support both locally and globally



We’re with you all the way

At Bürkert we think about more than sales and delivery.
Our technical support team is thoroughly acquainted with our products and solutions, has extensive technical experience and a broad knowledge of applications and processes. We are able to offer our customers the best possible support and advice regarding operation, service, troubleshooting and rectifying faults as well as instruction and training.

Your shortcut to Bürkert



COMMISSIONING

- Fitting of valves or sensors
- Programming and putting into service
- Improving efficiency by optimising system settings
- Instruction and training of staff

PREVENTIVE MAINTENANCE

- Examination of installation and preparation of a maintenance plan
- Periodic inspection, if applicable via remote monitoring
- Calibration of sensors and systems
- Function test

TROUBLESHOOTING AND FAULT RECTIFICATION

We have programs, software and tools that are specially designed to offer the fastest, most efficient service.

Since we have a very large local stock, we have easy access to spare parts and can provide rapid support.

INSTRUCTION AND TRAINING

If you would like to know more about our products and systems and how they are used, we are happy to put together a suitable course at your premises or ours.

Contact our service team to discuss your wishes and requirements in more detail.
